

Alawi AlAlawi

Digitalization Manager — BMW Group KSA · Riyadh, Saudi Arabia

alawalawi.github.io/Resume · linkedin.com/in/alawalawi · Riyadh, Saudi Arabia & Bahrain · English · Arabic (native)

PROFILE

I run the importer side of the OEM–importer seam.

Fourteen years in automotive retail, starting inside the dealer management system and ending up owning the digitalization agenda for a national importer. The work is making a legacy DMS, a CDP and marketing stack, a cloud contact center and an OEM's own retail standards agree on one customer number — one that holds up to both a board review and an OEM audit, and keeps holding up four quarters later.

That is unglamorous work, and it is where these programs usually fail.

I came up through the DMS administrator's chair before the manager's chair, so I read the data model underneath a platform rather than only running the procurement for it. In a market filling with AI-retail vendors selling to importers, that is the difference between buying a claim and auditing one.

SCOPE

FUNCTION	Digitalization, CRM, customer experience, contact center, business intelligence
ORGANIZATION	19 across inbound contact center, outbound and CRM back office
BRANDS	4 current; 13 across career
MARKETS	Saudi Arabia and Bahrain
COMMERCIAL	Annual capital plan for the function; 10+ vendor portfolio
GOVERNANCE	Quarterly customer board to the OEM Middle East Office

EXPERIENCE

Digitalization Manager

BMW Group KSA · Riyadh, Saudi Arabia · Apr 2025 – present

- Own the digitalization roadmap across four brands, integrating DMS, CRM/CDP, contact center and marketing automation, with real-time leadership reporting into the OEM Middle East Office.
- Own the function's capital plan and the vendor portfolio behind it — selection, negotiation, approval and delivery governance across marketing automation, telephony, AI, DMS integration and messaging suppliers.
- Deployed an AI customer-engagement agent across web chat, WhatsApp and social in Arabic and English, from vendor selection through DMS integration to live operation.
- Delivered a self-serve service-appointment booking journey in a 30-day sprint, meeting a national regulatory lead-time mandate across all regions.
- Built the analytics layer for sales and customer operations in Power BI, including an executive view over 80,000+ NPS responses with a bilingual categorization taxonomy and a model over 200,000+ records.

CRM Manager

BMW Group KSA · Riyadh, Saudi Arabia · Nov 2023 – Mar 2025

- Led a 19-person customer operations organization across inbound contact center, outbound and CRM back office, merging three separate reporting lines into one KPI framework with an Erlang-based staffing model.
- Rebuilt the voice-of-customer and NPS operation end to end — daily reporting, detractor recovery, and a quarterly customer board to the OEM Middle East Office. Lifted Sales NPS by 11 points and took the market to first among major regional peers.

- Established the customer-data integrity regime for the DMS: de-duplication at scale, edit controls, mandatory fields, audit logging and role-based access. Lifted lead health above 90%.
- Delivered a four-brand CDP and marketing-automation platform, and realigned media spend to revenue using enriched first-party data rather than conquest targeting.

Retail Performance Assistant Manager

BMW Group, Ferrari, Maserati, Jaguar & Land Rover importer · Bahrain · Feb 2016 – Oct 2023

- Customer relations and contact center leadership across a multi-brand importer, spanning CRM operations, retail performance reporting and OEM program delivery.

Customer Relations Assistant Manager

BMW Group, Ferrari, Maserati, Jaguar & Land Rover importer · Bahrain · Apr 2015 – Jan 2016

DMS Administrator (Autoline / Kerridge)

BMW Group, Ferrari, Maserati, Jaguar & Land Rover importer · Bahrain · Sep 2013 – Mar 2015

- Administered a dealer management estate of 74 Autoline licenses, rising to 94, across a multi-brand importer.

CERTIFICATION

CFA Institute — Level 1, passed June 2019 (above the 90th percentile). Self-funded alongside a full-time role; registered as a Level 2 candidate afterward.

CAPABILITIES

Customer relationship management (CRM) · Digital transformation · Business intelligence (Power BI) · Customer experience · Contact center operations · Data governance · Marketing automation · Automotive retail · Team leadership · API integration · Keyloop Autoline · CDK Drive · SAP CDP · Emarsys
